CATS
GLOBAL SCHOOLS

Cats College accreditation letter.

To Whom It May Concern,

On behalf of CATS Colleges, I am pleased to introduce XPERTSTEM, an international academic challenge for students in Grades 3–12, designed to celebrate and reward excellence.

The XPERTSTEM Competition brings together students, parents, and teachers, supporting young learners as they grow from national success to international recognition.

Through engaging exams and activities, the competition helps students strengthen their skills in Science, Technology & Coding, English, and Mathematics, while giving them the opportunity to showcase their talent on a global stage.

XPERTSTEM is accredited and certified by CATS Global Schools, a prestigious group of international educational institutions.

Our dedicated staff are delighted to support and facilitate the upcoming global final exhibition in the United States of America and in the United Kingdom. Our goal is to ensure that all students have a rewarding, educational, and memorable experience.

We warmly welcome your participation in XPERTSTEM.

Kind regards,

--

Alex Fitsner
